

T.O.R.A. - CL7 - 001

Date Last Updated: January 1, 2024

Classification Level: Top Secret

Subject: Genesis of the Timetravel Oversight and Regulation Authority (T.O.R.A.)

1. Introduction

The Timetravel Oversight and Regulation Authority (T.O.R.A.) was established to oversee, regulate, and ensure the safe use of temporal technologies. This document details the origins of T.O.R.A., providing a comprehensive account of the events leading to its inception.

2. Discovery of Temporal Anomalies

In the late 20th century, reports of unexplained temporal anomalies began to surface. These anomalies were initially dismissed as natural phenomena or hoaxes. However, in 1986, a classified investigation by the United States government revealed evidence suggesting the existence of temporal distortions caused by advanced, unidentified technology.

3. Formation of the Temporal Anomalies Task Force

In response to these findings, the Temporal Anomalies Task Force (TATF) was formed in 1992. Comprised of experts in physics, engineering, and intelligence, the TATF's primary mission was to investigate the source of these anomalies and assess potential threats.

4. Establishment of T.O.R.A.

Recognizing the immense potential and dangers of temporal technology, the United States government established the Timetravel Oversight and Regulation Authority (T.O.R.A.) in 1995. T.O.R.A.'s mandate was to regulate the use of temporal technologies, conduct research, and ensure the safety and security of the timeline.

5. The Leonardo Da Vinci Connection

During their investigations, the TATF uncovered a device capable of temporal communication. In 2009, scientists succeeded in the discovery of the ANNOTRON, a device that could video call its past self. This marked the first practical application of temporal technology.

6. The Role of Site 7

Site 7 was designated as the primary research and operational hub for T.O.R.A. It housed the most advanced temporal research facilities and served as the headquarters for high-level T.O.R.A. personnel. The founder of T.O.R.A., Agent 07 - 01, resided at Site 7 and was responsible for overseeing the organization's operations.

7. Development of the ChronosGate

In March of 2012, under the guidance of Dr. Natalie White (05 - 016) and Agent Davis Scotchwood (04 - 012), T.O.R.A. developed the ChronosGate. This device allowed for physical transportation back in time, revolutionizing temporal research and exploration.

8. The First Temporal Expedition

On April 18, 2012, Archie Benton (0 - 063) became the first person to travel through the ChronosGate. This historic event marked a new era in temporal exploration, solidifying T.O.R.A.'s role as the global authority on time travel.

9. Classified Recordings and Security Measures

To maintain the integrity of the timeline, T.O.R.A. implemented stringent security measures. Classified recordings were made for all temporal missions, and only personnel with Level 3 clearance or higher were permitted to access these records. Agent 07 - 01 was the primary voice for these classified recordings.

10. Conclusion

The establishment of T.O.R.A. marked a pivotal moment in human history. By regulating and overseeing the use of temporal technologies, T.O.R.A. has ensured the safe and responsible exploration of time, safeguarding the timeline for future generations.
